## FOR IMMEDIATE RELEASE

### LLM PUSHES THE BOUNDARIES OF TECHNOLOGY-ASSISTED REVIEW (TAR)

Second Release of Lauded e-Discovery Review System.

**Austin, Texas (May 22, 2013)** Liquid Litigation Management, Inc. (LLM), a company dedicated to excellence and effectiveness in e-discovery and case management software, released an update to its ground-breaking Technology-Assisted Review (TAR) feature today. The development team at LLM has implemented a new and proprietary "smart algorithm" that expedites the TAR process. The new algorithm takes a uniquely proportioned sample of documents whose classification has changed throughout review iterations and sets them aside for human review. This human review of documents helps train the system to make better and more consistent decisions, thereby reaching stability faster and more efficiently.

TAR can also be used on opposing counsel's production in addition to e-discovery documents. This gives legal teams keen and swift insight into opposing counsel's production at a fraction of the time needed for manual review. LLM is known throughout the e-discovery industry for providing powerful and efficient technology delivered in a usable product.

---

**Logical Solution. Legendary Service.** LLM, Inc. offers *Liquid Lit Manager™*, a web-based solution enabling legal teams to review discovery, produce documents, and manage related daily case materials through a single interface. It is the only product on the market that integrates e-Discovery and case management, which is why it is favored by many AmLaw 100 & 200 law firms, Global 100 firms and Fortune 100 companies.
